

HZS35 Concrete batching plant

1. Competitive price and quality
2. Compact structure, reliable performance
3. Warranty: 12 Months
4. CE, ISO9001:2008 certificate

Detailed Product Description

HZS35 concrete mixing plant is one of the small-sized plant series of HAOMEI company. It is semi-automatic concrete mixing block composed by feeding, batching, mixing, electrical control and steel structure components, suitable for small-scale construction projects, precast yard and commercial concrete companies.

Main features

- Adopt combined structure and modular unit, convenient to install and remove;
- Mixing and aggregate lifting system adopt JS750 double-shaft compulsory concrete mixer which offers high quality and efficient mixing;
- Aggregate batching system adopts PLD1200 concrete batcher which offers efficient and accurate measurement;
- Powder lot is electronic measured, highly accurate dosing;
- Water is flow-metering, simple and practical, highly accurate dosing.

Technical parameter

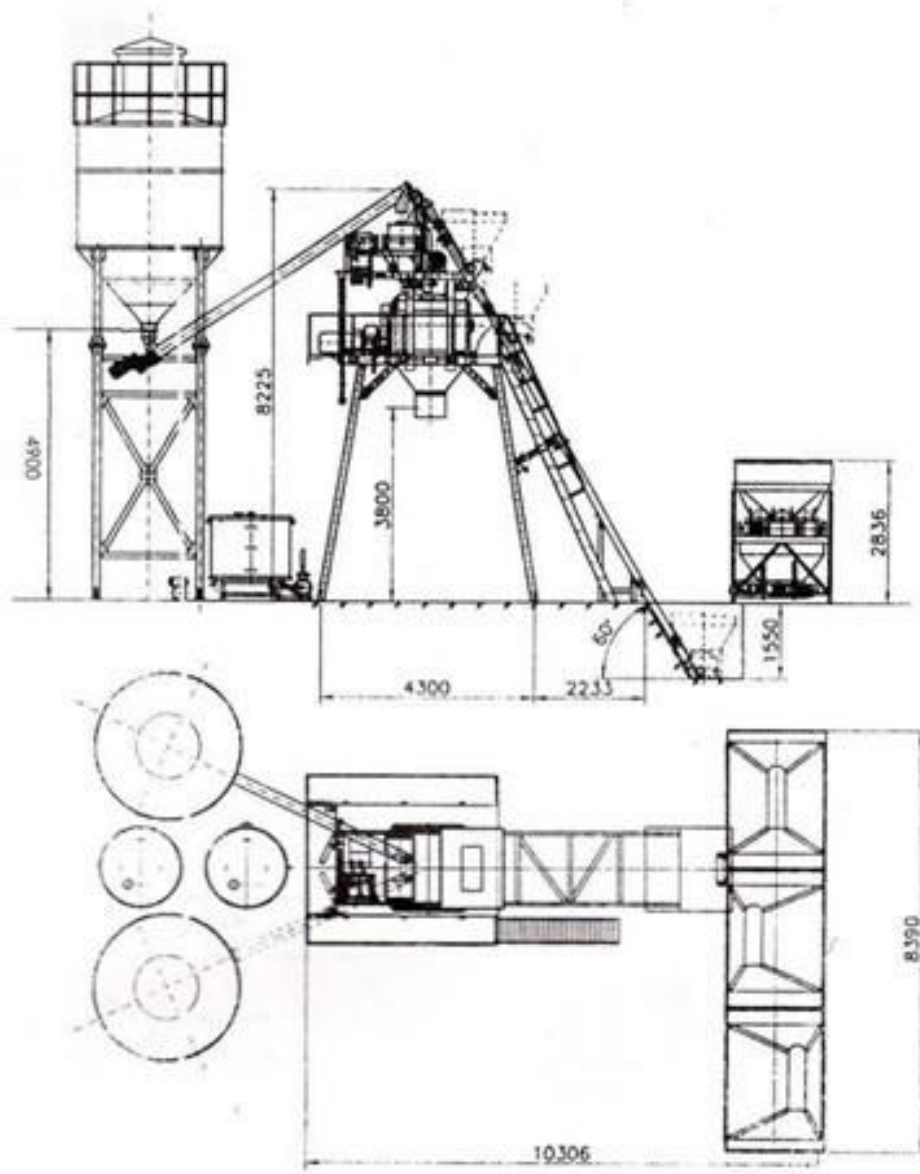

Main technical data	
Type	HZS35
Productivity in theory	35m ³ /h
Mixer	JS750
Mixer power	30KW
Maximum aggregate diameter	80mm
Discharging volume of mixer	750L
Aggregate feeding method	Skip hopper
Batcher	PLD1200
Aggregate weighing	2250kg ±2%
Cement weighing	450kg ±1%
Water(flow-metering)	300kg ±1%
Overall dimension(during operating) (LXWXH)	8685mmX5560mmX6550mm(discharging height is 2.7m) 10115mmX5560mmX8405mm(discharging height is 3.8m)
Total power	60kw
Total weight	9350kg (2.7m discharging height)

	11870kg(3.8m discharging height)
Control	Semi-automatic batching, manual operated
Cement silo(optional)	Required on clients' demand, 50T、100T available
Cement screw(optional)	Each cement silo equipped with one ϕ 219 screw

Please note:

1. The total power doesn't include the power of cement screw;
2. Non-standard design could be made according to clients' demand;
3. The above-mentioned data could be changed due to the designing improvement, please check the updated configuration when purchasing.

General layout

Main components

Concrete mixer

JS750 750L 1200L 36-45m³/h 60-80mm 30kw 4430×3615×3385mm

Batcher

Cement silo

Component

Case

The success installation of HZS35 concrete batching plant in Philippines.

June

11th,2011

With the cooperation of our customer in Philippines, after 15 days of hard work, our technician has assisted to finish the debugging of the HZS35 delivered.

This plant is fully automatic control, will be in service for our client's concrete batching need in the next following years.
